Organisation	Spottedger demo workspace
Brand	Apple
Campaign	Apple on radio
Period	Day 1 to Day 2 (Lagos time)
Stations	Cool FM Abuja, Cool FM Lagos, Metro FM Lagos, Nigeria Info Abuja, Nigeria Info Lagos, Rhythm FM Lagos, Wazobia FM Abuja, Wazobia FM Lagos
Source	Recorded from the station's official online stream. What listeners heard on FM may differ.
Generated	Day 2, 03:09 Lagos time

Summary

9 Booked spots	7 Aired as booked	87% Compliance rate	1 Not detected in a fully monitored window	0 Aired outside the time band	0 Partial play (cut short)
0 Wrong version	1 Inconclusive: partial coverage	0 Not monitored (left out of the score)	0 Still being checked	0 Pending (band not over)	0 Extra (aired, not booked)

Compliance

Compliance rate 87.5%: 7 aired as booked, out of 8 booked spots that could be checked. Left out of the score: 0 not monitored, 1 inconclusive because of gaps in our listening, 0 still being checked and 0 whose time band is not over yet. A gap in our listening never counts against a station.

Only Not detected in a fully monitored window counts as a miss against a station. The make goods list also holds spots that aired cut short, as the wrong version or outside the booked band, and never an inconclusive one. Inconclusive: partial coverage means a gap in our listening was long enough to hold the advert, so we cannot say whether it played.

8	Day 2	Wazobia FM Abuja Official online stream	02:00 to 03:00		29s English		Not detected in a fully monitored window We listened to all 60 minutes of the band 02:00 to 03:00 and did not hear this advert.			
9	Day 1	Wazobia FM Lagos Official online stream	22:00 to 23:00	22:48:58	29s English	29 of 29 s	Aired as booked Detected at 22:48:58 in the booked band 22:00 to 23:00, full length, right version.	Both fingerprints agree	0.99	Clip 11

Coverage record

Coverage is the minutes Spotledger was actually listening to each station's official stream. A spot is called not detected in a fully monitored window only when no gap in our listening inside its booked band was long enough to hold the advert. If there was such a gap, the line says inconclusive. Under half of the band listened to is not monitored.

Cool FM Abuja: 15.8% monitored. Source: Official online stream.

Minutes in period	Monitored	Stream down	Silence	Not monitored	Gaps of 2 minutes or more
1629	258	117	0	1254	7

Gaps: Day 1, 00:00 to Day 1, 20:53 (1253 min, not monitored); Day 1, 21:06 to Day 1, 21:09 (3 min, stream down); Day 1, 22:47 to Day 1, 22:49 (2 min, stream down); Day 1, 22:52 to Day 1, 22:54 (2 min, stream down); Day 1, 23:35 to Day 1, 23:38 (3 min, stream down); Day 2, 00:00 to Day 2, 00:03 (3 min, stream down); Day 2, 00:17 to Day 2, 01:55 (98 min, stream down).

How Spotledger checks

Spotledger AI listens to each station's official web stream in one-minute pieces and compares the audio with the adverts you uploaded, using two kinds of audio fingerprint: a classic fingerprint and a neural fingerprint. A match must line up in time from start to finish. Each line shows the detector (Classic fingerprint, Neural fingerprint, Both fingerprints agree, or Words in the transcript) and a match score from 0.00 to 0.99. A match with a score below 0.80, or a find by the neural fingerprint alone with a score below 0.94, is marked check pending until a person has listened to it. The stream we listen to is the station's own web stream, which can differ from the signal on the dial, for example in local ad breaks. Not detected in a fully monitored window means we were listening to every part of the band that could hold the advert and did not hear it. It is not a claim about what the station did.

How to dispute a line

If you think a line is wrong, open it in Spotledger and choose Flag, or reply to the person who sent you this report with the line number and your reason. A Spotledger reviewer listens to the clip and the recording around it and answers you. If the line is changed, you get a new version of this report.

Report fingerprint

13fc510e7f45d279e406bf6814263d5dab1095ec59a457ca53da9cb18e2076d3

SHA-256 of the report data (the spots, summary and coverage record, without the generation time). It changes if any line changes.
